

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Raiffeisen Bond Fund „I” Series (ISIN: HU0000718259)

Fund Manager: Raiffeisen Befektetési Alapkezelő Zrt., a member of the Raiffeisen Bank Group

Objectives and investment policy

The objective of the Raiffeisen Bond Fund is, by taking advantage of trends in the domestic government bond market and while keeping risk at a reasonable level as determined by the fund manager, to provide a return for the unit holders of the fund that is competitive with the yield on Hungarian government securities of 4-5 years’ maturity.

The fund invests the bulk of its assets in Hungarian government securities with a remaining maturity of more than one year, NBH bills and to a more limited extent in corporate bonds. In certain periods it is possible that the fund invests in a greater extent in Hungarian government bonds of a 10-15 year maturity that carry significant risk, but it may also be the case that government bonds maturing in a shorter, 2-3 year period are predominant in the fund.

The units of the fund may be purchased and redeemed on any

trading day. All working days are trading days except for those that are designated by the distributor as trading holidays – in accordance with the statutory provisions – or on which trading is suspended due to extraordinary circumstances.

Derivative instruments may be used for hedging purposes and, in addition, to a limited extent, as a part of the investment strategy.

The fund typically invests in instruments denominated in Hungarian forint.

The fund is a reinvesting fund, meaning that it reinvests the income it generates.

This form of investment is best suited to investors with a middling risk appetite, who have an average risk-bearing capacity.

Recommendation: this fund may not be appropriate for investors who plan to withdraw their money within 2 years.

Risk and reward profile

- The fund’s “I” series started in January 2017, and therefore some of the historical data used for calculating the synthetic indicator, which serves as the basis of the above-mentioned risk rating, is, in accordance with the statutory provisions, based on the performance of an artificial reference portfolio.
- The classification of the fund under category 3 based on the risk/reward profile is attributable to the fact that a significant portion of the fund’s assets are invested in relatively long-term government bonds.
- The past data used for the calculations are not necessarily reliable indicators of the fund’s future risk profile.
- The designated risk/reward profile is not guaranteed to remain unchanged, and the categorisation of the fund may shift over time.
- Not even the lowest category can guarantee a risk free investment.

The following are the risks that are not taken into account when assigning the risk category, but that are of significance in terms of the fund:

Credit risk: Some of the fund’s assets are invested in bonds and/or money market instruments (directly or in the form of credit derivatives).

There is a risk that the issuers may become insolvent (or that their credit quality deteriorates), and that these bonds and/or money market instruments (or credit derivatives) lose their value in part or in full.

Liquidity risk: There is a risk that a given position cannot be sold in time at an adequate price. This risk may lead to the suspension of redemptions of the investment fund units.

Counterparty risk: The fund concludes transactions with various contractual counterparties. There is a risk that these contractual counterparties do not satisfy the fund’s requests owing to, for example, insolvency.

Operational risk: There is a risk of loss caused by a disturbance in internal procedures/systems or by external events (for example, natural disasters). Safekeeping carries a risk of loss in respect of the fund’s assets that may be caused by the insolvency of the custodian or sub-custodian or the violation or abuse of its obligation to act prudently.

Risk arising from the use of derivative transactions: The fund may use derivative transactions not only for hedging purposes but also as an active investment tool, as a result of which the risk of fluctuations in the fund’s unit price increases.

Concentration risk: The fund may hold 100% of its assets in Hungarian government bonds under permission of Magyar Nemzeti Bank, which means news or events related to the issuer may affect greatly the risk of fluctuations in the fund’s unit price.

Charges

The fees paid to the fund serve to cover the costs of the fund's operation and include the costs of marketing and distribution. These charges reduce the potential growth of the investment in the fund.

One-off charges taken before or after you invest

Entry charge	maximum 3%
Exit charge	maximum 4%
Surrender fee	2%

This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.

Charges taken from the fund over a year

Ongoing charge	1.44%
----------------	-------

Charges taken from the fund under certain specific conditions

Performance fee	None
-----------------	------

The entry, exit and switching fees indicated are the maximum chargeable percentage values. Instead of the percentage fee, a fixed fee may be charged, which is equal to a maximum of HUF 3,000 in the case of entry and exit charges and HUF

1,500 in the case of the switching charge. In certain cases the fees may be lower than these; please ask your financial advisor's assistance in this matter! A switching fee may be charged if the proceeds from the redemption are used for purchasing units of another investment fund that is managed by the fund manager. A surrender fee may be charged upon the redemption of the investment fund units, in the cases specified in the management regulations.

The data regarding ongoing charge is based on the last year's expenses, for the year ending in 2018. 12., and the value of this charge may vary from year to year. The ongoing charge do not include mandate fees, commissions and transfer charges related to securities trading, except for the entry and exit fees charged when the fund invests in other collective investment securities.

Additional information about fees can be found on pages 60-69 of the fund management regulations at the following link: <https://alapok.raiffeisen.hu/aktualis/tajekoztato>

Past performance

- The diagram is only of limited use as a guide to future performance.
- The yields have been calculated on the basis of the net asset value per investment fund unit, before deduction of any entry, exit or surrender fees.
- The fund was launched in 1997 while series "I" of the fund started in January 2017.
- The relevant data of 2017 illustrates the yields of an incomplete year.
- The data in the diagram illustrate the fund's yields in Hungarian forint.

Practical information

- The fund's custodian is Raiffeisen Bank Zrt.
- The fund's key investor information (in both English and Hungarian), the prospectus and management regulations, the daily net asset value of the fund, the reports that provide regular information updates (annual and semi-annual reports, monthly portfolio reports) and the official announcements on the fund (in Hungarian) may be viewed and/or may be obtained free of charge at the points of sale and at the fund manager's registered office, as well as at the fund's publication site. Prior to making an investment decision, please review the documents related to the fund.
- The fund's publication site: the fund manager's website (alapok.raiffeisen.hu), as well as the www.kozzetetelek.hu website.
- The fund's prospectus and management regulations are available at: <https://alapok.raiffeisen.hu/aktualis/tajekoztato>
