Raiffeisen International Equity Fund of Funds "E" Series

(ISIN: HU0000719976)

Fund Manager: Raiffeisen Befektetési Alapkezelő Zrt., a member of the Raiffeisen Bank Group

Objectives and investment policy

The objective of the Raiffeisen International Equity Fund of Funds is to achieve the greatest possible capital gain with risks that are deemed reasonable by the fund manager, by taking advantage of the trends in the developed equity markets (including primarily the US, European and Japanese stock exchanges).

The fund invests primarily (at least 80% of its assets) in the units of investment funds which have a global focus and whose primary goal is to put together a diversified portfolio of developed market equities.

The units of the fund may be purchased and redeemed on any trading day. All working days are trading days except for those that are designated by the distributor as trading holidays – in accordance with the statutory provisions – or on which trading is suspended due to extraordinary circumstances.

Derivative instruments can only be used for hedging purposes (with a view to reducing risks).

The fund primarily invests in assets denominated in euro. However the fund's risk associated with exchange-rate movements is determined by the foreign-currency exposure of the investment funds that constitute its target investments, which means primarily exposure to US dollar, euro, GB pound and Japanese yen.

The Raiffeisen International Equity Fund of Funds "E" series can be purchased in EUR.

The fund is a reinvesting fund, meaning that it reinvests the income and dividends it earns.

This form of investment is best suited to investors with a high risk appetite, who have a higher-than-average risk-bearing capacity. Recommendation: this fund may not be appropriate for investors who plan to withdraw their money within 5 years

Risk and reward profile

- The fund's investment policy was modified in May 2014, and therefore some of the historical data used for calculating the synthetic indicator, which serves as the basis of the above-mentioned risk rating, is, in accordance with the statutory provisions, based on the performance of an artificial reference portfolio.
- The classification of the fund under category 5 based on the risk/reward profile is attributable to the fact that the great majority of the fund's assets are invested in equity funds.
- The past data used for the calculations are not necessarily reliable indicators of the fund's future risk profile.
- The designated risk/reward profile is not guaranteed to remain unchanged, and the categorisation of the fund may shift over time.
- Not even the lowest category can guarantee a risk free investment.

The following are the risks that are not taken into account when assigning the risk category, but that are of significance in terms

of the fund:

Credit risk: Some of the fund's assets are invested in bonds and/or money market instruments (directly or in the form of credit derivatives). There is a risk that the issuers may become insolvent (or that their credit quality deteriorates), and that these bonds and/or money market instruments (or credit derivatives) lose their value in part or in full.

Liquidity risk: There is a risk that a given position cannot be sold in time at an adequate price. This risk may lead to the suspension of redemptions of the investment fund units.

Counterparty risk: The fund concludes transactions with various contractual counterparties. There is a risk that these contractual counterparties do not satisfy the fund's requests owing to, for example, insolvency.

Operational risk: There is a risk of loss caused by a disturbance in internal procedures/systems or by external events (for example, natural disasters). Safekeeping carries a risk of loss in respect of the fund's assets that may be caused by the insolvency of the custodian or sub-custodian or the violation or abuse of its obligation to act prudently.

Risk arising from the use of derivative transactions: The fund is permitted to execute derivative transactions only for hedging purposes, and therefore the use of derivative transactions increases the risk of fluctuations in the fund's unit price primarily through counterparty risk.

Charges

The fees paid to the fund serve to cover the costs of the fund's operation and include the costs of marketing and distribution. These charges reduce the potential growth of the investment in the fund.

One-off charges taken before or after you invest

Entry charge	maximum 3%
Exit charge	maximum 4%
Surrender fee	2%

This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.

Charges taken from the fund over a year

Ongoing charge	2.27%
----------------	-------

Charges taken from the fund under certain specific conditions

Performance fee	None
-----------------	------

The entry, exit and switching fees indicated are the maximum chargeable percentage values. Instead of the percentage fee, a

fixed fee may be charged, which is equal to a maximum of EUR 15 in the case of sales and redemption fees alike. In certain cases the fees may be lower than these; please ask your financial advisor's assistance in this matter! A surrender fee may be charged upon the redemption of the investment fund units, in the cases specified in the management regulations.

The data regarding ongoing charge is based on the last year's expenses, for the year ending in 2018. 12., and the value of this charge may vary from year to year. The ongoing charge do not include mandate fees, commissions and transfer charges related to securities trading, except for the entry and exit fees charged when the fund invests in other collective investment securities.

Additional information about fees can be found on pages 61-70 of the fund management regulations at the following link: <https://alapok.raiffeisen.hu/aktualis/tajekoztato>
